I'm a Full Stack Web Developer looking for new opportunities in the software field.

Work Experience

Ruby on Rails Developer

Meru technologies - Distrito Nacional

March 2021 to Present

Ruby on Rails Backend developer. I helped in the creation of different routes that the business requirement needed. I've worked in Rails project that are composed with various API's wrote with Ruby and Rails framework. I've build migrations for new tables, new fields of existing tables, new routes for CRUD operations, new models, new serializers, new interactors, new libraries that handle assets, uploaded files, studied new gems to implement new ways to validate the params and create new test in RSpec for the services I've created and for other services already created.
