EXPERIENCE

MERU

Backend Rails Developer   2021- 2022

- In this company I've worked in Rails projects composed of various APIs built with Ruby and Rails framework, where I've built migrations for new tables, new fields of existing tables, new routes for CRUD operations, new models, new serializers, new interactors, new libraries that handle assets, uploaded files, studied new gems to implement new ways to validate the params and created new tests in RSpec for services I've created and for services already created by team members.

GFRMedia

Full Stack Web Developer   2022- 2022

- In this company I've worked in Rails and MERN Stack projects compose with various API's, some build with Rails and others build with NodeJS, Express, MongoDB and React framework, where I fix bugs, implemented changes required in React and Rails code, refactor the code to upgrade packages to newer versions.
